

## Catch up Premium Recovery plan 2020 -2021 (Updated 22<sup>nd</sup> September 2021)

### Focus: Home Learning & Recovery Curriculum

It is recognised that the challenges of educational provision over the period of closure have given rise to the need for development of home learning and parent access and engagement in communications. As schools returned in the autumn term 2020, disruption continued and it is anticipated that this will continue for the months to come

The Government have identified a 'Coronavirus (Covid-19 Catch up Premium ' resource for all schools to enable the swift development of educational provision in uncertain times. <https://www.gov.uk/guidance/coronavirus-covid-19-catch-up-premium>

Orchard School is eligible for the premium as a LA-maintained special school. We will be fortunate in receiving £240 for each pupils place based on 2019-2020 academic year place numbers and will be received in 3 tranches; Autumn term; Spring term; Summer term. The total overall payment we anticipate to be in the region of £35,500.

Schools should use this funding for specific activities to support their pupils to catch up for lost teaching over the previous months, in line with the guidance relating to the need for high quality education is not optional; the curriculum should remain broad and balanced; a focus on remote education. It is also necessary to ensure that the School continued to uphold its responsibility of EHCP provision. Further guidance is available;

<b>Academic Barriers</b>	Due to children being absent from school during Covid Lockdown, in addition to classes and individuals needing to self-isolate due to track and trace, children are spending more time at home than in previous years. We have a number of children which were identified as being extremely clinically vulnerable and were also advised to stay at home by consultants during the second lockdown. Our data shows that Independence is the subject is which most children are on track to meet their target, however due to the low attendance most children are not on track to meet their targets in the aspects of Communication, Maths, Literacy, PSED, Physical Development and Science.
<b>Additional Barriers</b>	Due to the complexity of children's needs, it is not highly appropriate to teach via Powerpoint/online lessons when delivering remote/home learning, this is partly because most children require 1:1 individual work or very small group work and children are not taught as a whole class.

	<p>Families are being asked to teach their child at home, though many do not have the knowledge of how to do this and what methods to use or the resources to do so. Many families do not have access to the appropriate methods of technology to support online communication, access to the website and access to efficient methods of feeding back on their child's Home Learning.</p> <p>A number of families have not seen their child in our school, in person (New pupils this academic year), we would normally invite families in on a regular basis and hold family mornings/workshops and individual face to face practical demonstrations as well as discuss our curriculum with parents using specialist resources to help families understand how we teach their children.</p>
