

Creative Curriculum

UW Home Learning

Step 15 and 16

Experiences

Investigate plants, animals, living things, materials together. Ask simple questions e.g. what do you think will happen? How can we find out? What will we need? Lot's of exploratory play, use tools and utensils for specific purposes. Spend lots of time outside and grow things, observe the results, talk about change and growing, and the environment

The world

Help me to find out; to talk about and ask how things work and explore objects; materials and living things. Experiment and talk about changes in materials from changing temp, floating, sinking, magnets and shadows. How can you help improve the environment—help tidy up outside and help with the recycling

People and communities

Help me talk about what my family are doing and why, Show photos of me and my family and special events and celebrations. Show me baby photo's and old photo's of my favourite people, talk about the past and traditions. Involve me in family events and celebrations, such as birthdays and visiting special places and/or places of worship. Talk about why it is happening and how other families might be different to yours. Talk to me about past/future events, home and school

Activities

Do some investigations with what children are interested in —see websites for some fab ideas. Cook and bake talk about changes, name ingredients and actions predict change e.g. Flavours, what happens when we put it in the oven/fridge. Use tools and equipment for a purpose e.g. jugs, tweezers, magnifying glasses

*I will ask lot's of questions and try to answer them myself. I can plan; make predictions, do what I planned, adapt it and talk about it. I will have an idea of past and future. I will care for animals and the environment. I will know that the people of the world are both similar and different.
