

Catch up Premium Recovery plan (Updated Sept 22)

2020: Initial Focus: Home Learning & Recovery Curriculum

It is recognised that the challenges of educational provision over the period of closure have given rise to the need for development of home learning and parent access and engagement in communications. As schools returned in the autumn term 2020, disruption continued and it is anticipated that this will continue for the months to come

The Government have identified a 'Coronavirus (Covid-19 Catch up Premium)' resource for all schools to enable the swift development of educational provision in uncertain times. <https://www.gov.uk/guidance/coronavirus-covid-19-catch-up-premium>. Orchard School is eligible for the premium as a LA-maintained special school. We will be fortunate in receiving £240 for each pupils place based on 2019-2020 academic year place numbers and will be received in 3 tranches; Autumn term; Spring term; Summer term. The total overall payment we anticipate to be in the region of £35,500.

Schools should use this funding for specific activities to support their pupils to catch up for lost teaching over the previous months, in line with the guidance relating to the need for high quality education is not optional; the curriculum should remain broad and balanced; a focus on remote education. It is also necessary to ensure that the School continued to uphold its responsibility of EHCP provision.

2021/2022: Focus: Recovery curriculum, enhancing wellbeing, enhancing parent/school relationships especially for the newest cohorts during the pandemic.

Following the difficulties over the past few years, our priorities are focused around ensuring our pupils feel confident, secure and in routines within school. Focusing on building relationships with families both home/school relationships but additionally enhancing parents' knowledge around our curriculum and what is the most important for their child to support their learning at home; both for if their child is learning from home due to class closure but also for day to day life in a 'normal-non-pandemic' context. A clear focus on staff knowledge and training to build staff confidence whilst supporting pupils' wellbeing through additional music, event-community days and real life opportunities that have been missed.

Team:	
Laura Valentine - Home Learning Lead (As of Sept 22- Senior Head of T&L)	Julie Radcliffe - Finance administrator
Lauren Petrie & Rebecca Edwards - Upper/Middle School head of department	Allison Shepherd : Deputy Head Teacher/Assessment
Mark Ridgeway & Ashley Elks - ICT team	
Louisa Stevens - Parent Liaison Officer	

Academic Barriers	<p>2020/21- Due to children being absent from school during Covid Lockdown, in addition to classes and individuals needing to self-isolate due to track and trace, children are spending more time at home than in previous years. We have a number of children which were identified as being extremely clinically vulnerable and were also advised to stay at home by consultants during the second lockdown. Our data shows that Independence is the subject is which most children are on track to meet their target, however due to the low attendance most children are not on track to meet their targets in the aspects of Communication, Maths, Literacy, PSED, Physical Development and Science.</p> <p>2021/22- Due to how unique our children are within their learning, there are areas of strength and weakness that differ across classes/needs groups and subjects. Across the school some of the areas in need of more focus include; PSED, Science and reading. Due to staff absence and</p>
--------------------------	--

	<p>closures at times focusing on children accessing a regular, routine and familiar class environment is crucial. The lack of access to real/live music lessons has also had an impact over the past few years; a need to re-gain this is vital for children's engagement and love of music and listening skills.</p>
Additional Barriers	<p>2020/21- Due to the complexity of children's needs, it is not highly appropriate to teach via Powerpoint/online lessons when delivering remote/home learning, this is partly because most children require 1:1 individual work or very small group work and children are not taught as a whole class.</p> <p>Families are being asked to teach their child at home, though many do not have the knowledge of how to do this and what methods to use or the resources to do so. Many families do not have access to the appropriate methods of technology to support online communication, access to the website and access to efficient methods of feeding back on their child's Home Learning.</p> <p>A number of families have not seen their child in our school, in person (New pupils this academic year), we would normally invite families in on a regular basis and hold family mornings/workshops and individual face to face practical demonstrations as well as discuss our curriculum with parents using specialist resources to help families understand how we teach their children.</p> <p>2022- Now that we are in a position to be able to invite families into school again, there are large cohorts of children and their families who have not had the usual face to face communication, invitations into class and into parent groups. It is vitally important that we work on these relationships to enable families to have a secure understanding of their children's work, levels and activities. Ensuring children's wellbeing and engagement within all aspects of the school day is a high priority, making their learning as real as possible. Due to the restrictions with face to face meetings over the duration of the pandemic, staff confidence within some areas of training has dropped a little, much of our training due to the nature of our children needs to be face to face and often include a practical element. Therefore a focus on developing and enhancing additional staff training to ensure teaching and learning across a range of areas is secure.</p>
